# TimeWaver Company Presentation

July 2023

The analysis and harmonization in the Information Field is not intended to cure, treat, mitigate, diagnose or prevent any disease or medical condition. It is intended to give the professional user the option, in a holistic context, to derive helpful information from findings from the Information Field. Each professional user should evaluate, based on their own experience, whether the application is useful in their practice. The Individualized Microcurrent Frequency (IMF) and Frequency Specific Microcurrent (FSM) programs of the TimeWaver Frequency system are not intended to cure, treat, mitigate, diagnose, or prevent any disease or medical condition. The terms used in the programs, databases and modules do not constitute statements concerning their effects. Information from the TimeWaver system should always be critically questioned and, if necessary, verified with further procedures. The TimeWaver Frequency system should always be used within the scope of the user's professional practice, license or certification and in accordance with the Instructions for Use and company-provided manual. The use of the TimeWaver Frequency system should not be treated as a substitute for a physician's advice, diagnosis or choice of therapy. The responsibility for the correct diagnosis and therapy always lies with the medical professional. The purpose of the product is to provide the professional user with a tool to explore application options.
